4,368.11 €

* VAT included

The add-on Modbus TCP Output Module enables connection to Building Management Systems through ethernet transmission, ensuring fast data transmission.

Centralized management
Simplify data center infrastructure management by using a centralized repository accessible from anywhere on the network through a powerful and easy-to-use console application.

Real-time monitoring
Immediate visibility to your entire physical infrastructure through centralized, real-time device monitoring and notification enabling quick assessment of events as they occur.

Fault notification
Real-time event notification minimizes response times to critical physical infrastructure situations. Enables IT Administrators to reduce mean time to repair, improve efficiency, and maximize uptime.

Multi-vendor device support
Extensive multi-vendor support for monitoring networked SNMP devices. Enable visibility of existing SNMP devices through threshold alert notifications, data trending and reporting.

Unified console
Customizable Windows and Linux client application enables instant access to StruxureWare Data Center Expert application from anywhere on the network.

NMS Integration
Integrate SNMP traps into an Enterprise Management System, allowing users to view alerts generated by devices managed by StruxureWare Data Center Expert.

Free text search
Quickly locate devices and alerts through the free search field.

Alarm filters
Customize the user interface to display devices in critical, warning or normal device statuses.

Agility

Auto-discovery
Reduces the time needed to install and deploy physical infrastructure devices by automatically detecting manageable devices on your network.

Mass Configuration
Provides a comprehensive mass configuration capability, allowing users to create, save, and push configurations or specific device settings to similar APC devices with a Network Management Card.

Mass firmware update
Decrease set-up time and complexity of managed devices by simultaneously upgrading firmware for multiple APC devices.

Custom mapping
Custom backgrounds, unique user-assignable icons, and drag-and-drop device placement make it easy to identify problem devices at a glance, minimizing downtime, errors, and cost.

Private networking
Reduce IP addresses needed on the public network to manage devices, by placing them on an isolated secure network.

Advanced device grouping
Define user access and viewing capabilities to individual groups. Control access to devices by administrator-defined user accounts. Additional user access can be managed by using the built-in LDAP and Active Directory Support.

Availability
Graphical trending analysis
Access current and historic data for any device or group of devices. Plot and graph multiple data points in a logical correlation to visualize potential hazardous trends.

Custom reporting
Create, save and schedule user-defined reports for ease of data collection, distribution and analysis.

Centralized Alert Repository
Access historical alerts from several appliances through one central database. Sort alerts by type, date, appliance, and/or device group.

Integrated data storage
StruxureWare Data Center Expert ships with internal storage for data and video collection. Additional storage can easily be made available using the built-in Network Attached Storage server support for long-term storage and archiving.

Localized user interface
Provides a localized user interface including alerts and alert descriptions in 10 local languages
