Portable 10x binoculars with Image Stabilizer, ideal for travel, bird watching and sports

Benefits:

- Get 10x closer to distant subjects, wherever you go
- Super steady view with a powerful optical Image Stabilizer
- Precision Canon optics for high resolution and accurate colours
- Well balanced, rubberised design for durability and comfort
- Ideal for bird watching, travel and sports

Get 10x closer to distant subjects, wherever you go

Compact, lightweight and practical binoculars that get you 10x closer to distant objects with intensity and clarity. Easy to carry with you wherever you go, they are ideal for travel, bird watching and a wide variety of spectator sports.

A super steady view with the powerful optical Image Stabilizer

A powerful optical Image Stabilizer quickly and accurately counteracts many different types of shake and movement. It even corrects shake introduced while panning if you are following your subject or viewing from a moving vehicle. Significantly reduced power consumption delivers up to 9 hours of continuous use from a single set of batteries.

Precision Canon optics for excellent high resolution viewing

Enjoy excellent quality with high resolution and low distortion thanks to Canon's precision optics. The optics feature the Super Spectra coating included in Canon's renowned EF lens range and deliver a vivid, high contrast view with accurate colour rendition, while eliminating unwanted internal reflections that can cause ghosting and flare.

Beautiful field of view from edge to edge

Experience a beautiful field of view with a clear, flat and low distortion view right to the edges thanks to the field flattener optics and Porro II prism design. See the full field of view in comfort with long 14.5mm eye relief ideal if you wear glasses.

Designed for ease, durability and comfort

Designed with a premium grip and feel and large rubber eyecups for comfortable, well balanced viewing, the conveniently placed Image Stabilizer button and smooth focus adjustment ring offer easy fingertip control from either hand, while a low-reflectance exterior and low gloss front help avoid disturbing birds and other wildlife.

Main specifications:

Weight & dimensions

Width:	127 mm
Depth:	70 mm
Height:	150 mm
Weight:	600 g

Technical details
