128.31 €

* VAT included

PosterArtist is a poster creation software program designed to be used by all levels of users to create professional-posters, banners and signage in just four easy steps. This template driven poster creation tool for PCs was developed by Canon specifically to create large-format posters quickly and easily. PosterArtist provides over 200 professionally designed templates, and over 1000 royalty free images and clip art that can be quickly customized and outputted to a variety of media. You can even import your own images such as company logos and digital camera photos. With PosterArtist, now you can quickly customize and print posters, banners, signs, and eye catching displays.

PosterArtist includes an Auto Design feature to make printing even easier-just specify your layout elements and the software will automatically generate a variety of designs for you to choose from. With PosterArtist, you can integrate variable data, enlarge scanned data, import presentations and other office documents, and bring in images directly from most digital cameras. Visit Canon's PosterArtist Website to learn more and download a trial version today!
