The Cisco MDS 9124 offers up to 24 autosensing Fibre Channel ports capable of speeds of 4, 2, and 1 Gbps in a compact 1RU form-factor chassis with 4 Gbps of dedicated bandwidth for each port and an aggregate platform bandwidth of 192 Gbps. The base configuration has 8 active ports with flexibility to upgrade onsite to 16 and 24 ports, in 8-port increments, with the Cisco MDS 9124 On-Demand Port Activation licenses. The Cisco MDS 9124 is an ideal platform as a standalone departmental SAN switch and as an edge switch in enterprise core-edge SANs. The 1RU compact design is ideal for space-constrained environments where high port density per rack is imperative.
