The Cisco TelePresence® Touch is a family of intuitive devices designed to give you a delightful experience when interacting with Cisco video conferencing systems - with just a touch or swipe of your finger. These touch-based devices are optimized for an effortless user experience from launching and ending a video conference, to sharing content, to viewing contact lists and directories, and even accessing video and voicemail messages.

With Cisco TelePresence Touch devices, you can quickly and easily access the most common tasks in the context of your meeting. The innovative design allows effortless integration with the various forms of synchronous and asynchronous communication that are already part of the workflow.

Features and Benefits

Cisco TelePresence Touch devices enhance the ease of connection and communication by providing instant access to meeting, contacts, directories, and content. The devices combine beautiful design and effortless user interaction with a consistent experience throughout the Cisco TelePresence portfolio.
