The 15E2 E-Series touchcomputer is an elegant, retail-hardened touch solution with a small footprint, developed to fit into hospitality and retail environments. The compact, ruggedized touchcomputer delivers a 15-inch touchscreen, Intel Celeron dual-core processor, 2GB RAM and 320GB storage. Designed to fit on top of a cash drawer, it can also be wall- or pole-mounted depending on the installation needs.

The 15E2 supports third party peripherals through four (4) USB and two (2) serial ports and has a second VGA output to add a second customer-facing display for advertising and customer communication. The connections are all nicely hidden from view in the I/O bay, offering a clean, modern look while avoiding incidental disconnection.

The 15E2 touchcomputer is designed for convenient serviceability with easy access to main components. Available with IntelliTouch zero-bezel surface acoustic wave (SAW) or AccuTouch micro-bezel 5-wire resistive touch technology, the 15E2 features a sleek glass-to-edge seamless design that is elegant and easy to clean. With no moving parts to wear out, touch response is fast, accurate, and driftfree using a finger, gloved hand, or soft stylus. Pure glass construction allows high light transmission without compromising durability or functionality.
