- Resistant to shocks, water splashes and dust (IP65)
- Vibrating and flashing caller alert
- Selectable profiles for indoor, outdoor and personal use

Designed to withstand tough everyday situations

If you have a craft workshop or a home with small children, you know how to handle a high-impact environment. So does the Gigaset E630 cordless phone. Surrounded by tools and equipment, or kids, challenges and disruptions are par for the course. That's why this robust cordless phone is splash-proof, as well as resistant to dust and shocks.

Comfortable and convenient handling

A vibrating caller alert and light signal mean you're always aware of incoming calls, even in a noisy environment. The comfortable handset makes talking a pleasure, with an easy-to-reach side key for fast and convenient volume control. This landline telephone has great sound quality. And if you do miss a call, a message key keeps you in the loop.

Enhanced with practical settings

You can very easily adapt the phone profile to your loud or quiet surroundings. Simplified call acceptance lets you answer the phone even if your hands are soiled or sticky. Fuss-free navigation thanks to the clear menus, an illuminated keypad and a TFT colour display makes it easy to browse the phonebook that efficiently stores up to 150 contacts.

Keep the conversation flowing

Multi-task and keep the conversation going - even when your hands are full. Advanced hands-free means you can always get the job done. With a talk time of up to 14 hours, the Gigaset E630 doesn't cut you short. And up to 300 hours of standby time means the handset can stay within easy reach as you complete your tasks.

ECO-DECT: Radiation free

Energy-efficient power supply means that the Gigaset E630 is easier on the environment - and on your wallet. Like all Gigaset cordless phones, it variably reduces the transmitting power from the handset to the base station depending on their distance apart. You can also decrease the transmitting power of the Gigaset E630's base station by 80% - simply select ECO Mode. What's more, radiation-free ECO Mode Plus switches off the transmitting power whenever your phone is in idle mode.
