There's space for everyone! The Gigaset C530's phonebook has space for up to 150 contacts, each with full name and up to 3 numbers. Mark your personal "VIPs" and make sure you remember their special occasions by setting a convenient reminder. And that's not all: the handy day/night switch mutes the ringtone whenever you need peace and quiet.

Sometimes catching up on the phone can literally take hours. But with a talk time of up to 14 hours, the Gigaset C530 won't let you down. Reliable cordless phone technology also lets you carry the handset throughout your home without worrying about battery power. And the Gigaset L410 hands-free clip supports smart multi-tasking while you chat.

Energy-efficient power supply means that the Gigaset C530 is easier on the environment - and on your wallet. Like all Gigaset cordless phones, it variably reduces the transmitting power from the handset to the base station depending on their distance apart. You can also decrease the transmitting power of the Gigaset C530's base station by 80% - simply select ECO Mode. What's more, radiation-free ECO Mode Plus switches off the transmitting power whenever your phone is in idle mode.

Being a good listener is as important as sharing your own thoughts. The Gigaset C530 analog telephone guarantees High Sound Performance with every call, so you can hear every word clearly - even when you're talking hands-free.

Often, time is of the essence. The Gigaset C530H is an extra handset that works with your Gigaset base station. Place it in your office, bedroom, hallway, or wherever else you need the convenience of fast phone accessibility. You can add up to 5 extra handsets, for a total of 6.

Stay up to date no matter what: the Gigaset C530A with an integrated answering machine picks up when you're unavailable. Welcome callers with a personal greeting or choose a pre-set message - 30 minutes of recording time lets them share what's on their minds. And the handset features a new message signal so you're always in the loop.
