The Intel® Compute Stick is a tiny device the size of a pack of gum that can transform any HDMI* TV or display into a complete computer. Available with a range of Intel® processors, it's everything you love about a desktop computer in a device that fits in the palm of your hand.

Portability and Power

A Intel® Compute Stick powered by the Intel® Core M processor offers the flexibility of having the power of a PC in a device that fits in your shirt pocket.

Built for Performance

While the Intel® Compute Stick is small in stature, it's what's inside that makes the biggest difference: a choice of Intel® Atom or Core M processors with up to 4 GB memory and 64 GB of on-board storage.

Sized for Convenience

It's not like a computer. It is a computer. Same operating system, same high quality graphics, and same wireless connectivity as a full-sized computer. Totally different dimensions.

Cool Under Pressure

Who wants to pay for a processor and not get all the performance? The Intel® Compute Stick features a tiny, quiet cooling fan inside to enable reliable and fast performance without overheating.
