Honeywell thermal transfer paper labels are an excellent choice for use in environmentally demanding applications, where labels must stand up to conditions such as heat and sunlight.

Thermal transfer printing technology uses thermally sensitive ink ribbons to produce bar codes that are both visible light and infrared scannable. Intermec Duratran thermal transfer label products, available in both paper and synthetic facestocks, provide durable, high quality printing and unlimited flexibility. For optimum performance, use Duratran thermal transfer media with Honeywell ThermaMAX ribbons.
