Enhanced Graphics Performance.

Visuals look great on the ThinkPad L460, thanks to the powerful AMD Exo Pro Radeon R5 discrete graphics chip. Whether you're assembling video presentations, editing product photos, or kicking back with a movie, the L460 fits the bill.

Thin and Light Design

At just 24.3mm thick and weighing in at as little as 1.9kg, depending on the feature set, the L460 is a great choice for on-the-go professionals.

Long Battery Life.

At up to 8.7 hours of battery life, the L460 will keep your business online even when plug-in power is not on tap.

Business-Class Security

Available with fingerprint reader, this laptop lets you use biometrics for login, so the swipe of your finger becomes your password. Intel® security features and vPro options step up protection and enhance manageability when deploying upgrades. And a Trusted Platform Module (TPM) chip further encrypts your critical information.

Ultra Durable and MIL-SPEC Tested

The L460 meets 12 US military-spec tests for ruggedness, durability, and quality: high pressure, humidity, vibration, high temperature, temperature shock, low pressure (15,000 ft), low temperature, and dust. In addition, innovative roll-cage technology and glass-fiber reinforced plastic add extra strength and rigidity.

Robust Connectivity

Despite being thin and light, the L460 has the ports you need - including legacy ports - to connect to the devices you need to get the job done.

Plenty of Storage

With multiple storage options - up to 1TB HDD or up to 512GB SSD, just to name two - you'll have plenty of room to store your largest files.

Responsive Performance

With up to 32GB of memory, you can run multiple high-end software applications without stalling your PC.
