Privacy Filters for Lenovo Laptops and x1 notebooks : Privacy, protection and reliable touch compatibility from Lenovo Privacy Filters from 3M.

Lenovo ThinkPad Privacy Filters utilize microreplication technology from 3M to create an excellent viewing experience on your high resolution displays. Lenovo Privacy Filters blackout side views quickly, delivering privacy and keeping visual hackers in the dark. This is a key benefit to companies as it provides the first line of defense against visual hacking protecting private information from being hacked by on lookers. Privacy filters also reduce glare from bright backlight panels and overhead lights though that's not its primary function. Another function is that privacy filters guards and protects your screen from scratches and smears keeping your monitor screens safe from unwanted destruction. We offer touch specific parts and non-touch parts to align with the device capabilities. Privacy Filters for ThinkPad notebooks/laptops allow you to work with the peace of mind that your information on your screen is safe from wandering eyes

It ensures the privacy of your clients records in compliance with state & country laws and regulations in industries like finance, consulting, healthcare, government and education (e.g., HIPPA (ensuring PHI), HITECH, NIST, PII (Patient Identifiable Information), ISO, PCI (Payment Card Info) Gramm Leach Biley Act-privacy in finance, Sarbanes-Oxley, CIPA (Children's Internet Protection Act) and several breach notification laws in various states

All Lenovo Privacy Filters for ThinkPad systems are constructed and built with high-grade optical film to ensure that the user maintains high clarity with no optical distortion.

All Lenovo Privacy filters for ThinkPad systems are lightweight and easy to install and includes 3M adhesive strips which allow for easy residue-free removal for multiple on-and-off uses.

All Lenovo Privacy Filters utilizes anti-reflective coating to reduce reflection. This improves efficiency by reducing the amount of light lost thereby improving image contrast by eliminating unwanted light sources.
