Do great things, Do familiar things, Do unexpected things
The best Windows yet is here.

It's the Windows you know, only better
Familiar and better than ever

Windows 10 is familiar and easy to use, with lots of similarities to Windows 7 including the Start menu. It starts up and resumes fast, has more built-in security to help keep you safe, and is designed to work with software and hardware you already have.

Millions of people are already using Windows 10

The Windows Insider Program is a global community of fans who love Windows and want to help make it better. Insiders see the operating system in its earliest stages, and play a role in shaping it. Their feedback has contributed to the best Windows ever.

It's how doing gets done

Make the web work the way you do

Microsoft Edge lets you move quickly from browsing to doing. Write1 or type notes directly on webpages and share them with others, read online articles free of distraction, and save your favorite reads for convenient access later.

Multi-doing helps you get to “done" faster

Get to done faster by better managing your desktop. Snap up to four things on one screen at the same time and create virtual desktops whenever you need more space or want to group things by project, like Office apps for work and games for play.

Flexibility to work how you want

The new Windows Store is the one place for all your favorites

Introducing the new Windows Store, a unified shopping experience across every Windows 10 device. Browse the store on your PC, tablet, or phone and easily download great free and paid digital content including apps, games, music, movies, and TV shows.

Great built-in apps that work across your devices

Windows 10 comes with great built-in apps4 like Maps, Photos, Mail & Calendar, Music, Movies & TV. And these apps use OneDrive to back up your information and sync seamlessly across your Windows 10 devices, so you're never far from what you need.

The best screen is always the one you're on

Windows 10 enables your apps to look and work great in all modes, on all touch PCs and tablets.

Introducing the first smartphone with PC-like power

Connect to a monitor, mouse, and keyboard to use your Windows 10 phone like a PC for getting things done or project to a larger-screen for big-time entertainment.

Interact with your device however you want

Touch, type, write, or speak: the choice is yours so you can use whatever works best for what you're doing.

Touch

Do things like write on a webpage, swipe through your photos, and snap apps into place.

Type

When you need to get more done, use your keyboard or the touch keyboard on devices with touch.

Write

Use a pen to draw naturally, or add notes to files, sign documents, or play around with art apps.

Speak

Just by talking, you can ask Cortana to set a reminder or write an email, and chat with friends and family on Skype.

You literally are the password

Any device can carry your content, but only Windows gives you a truly personal experience. With Windows Hello, your device authenticates and recognizes you based on your presence, providing extra security, convenience, and even a friendly hello.

Main specifications:

License

Software type:	Delivery Service Partner (DSP)
License type:	Get Genuine Kit (GGK)
License quantity:	1 license(s)

System requirements

Minimum hard disk space:	20 GB
