* VAT included

Create new opportunities and enhance meetings, presentations and learning experiences with the new interactive touch projector wall and bring collaboration to both class rooms and conference rooms alike. Combine multiple projectors into an ultra-wide, up to 6.5 m* full screen size interactive wall space on any surface.

The integrated infrared touch capability allows several people to enjoy simultaneous seamless interaction with pens and fingers across the entire screen area without limitation from borders.

Interactivity is key - Multi-Pen / Multi-Touch Solution

The interactive multi-pen modules (NP03Wi/NP04Wi) and the Multi-Touch module (NP01TM) in combination with NECs ultra-short-throw projectors (U- / UM-Series) transforms any existing flat surface into a borderless interactive workspace. The projector's integrated infrared camera system enables easy setup and calibration of the entire wall and manages interactivity.

Benefits include:

- Multi-Pen & Multi-Touch support including gestures (255 touch points)
- High responsiveness and performance
- Fast and easy auto-calibration
- Existing surfaces and boards can be used

Impressive Ultra-Wide Screen Projection

Create a seamless ultra-wide screen with up to four projectors with Scalable Desktop NEC Edition Edge Blending Software.

Benefits include:

- Edge Blending setup with integrated projector cameras for easy recalibration
- One-button push auto recalibration (short cut button)
- Maximum flexibility to individually configure your screen size

Just one click to recalibrate Interactive Wall

Use the one-button push auto recalibration functionality of the Interactive Wall Manager to easily readjust edge blending and touch accuracy. Alternatively, use the scheduler or network control commands.

Benefits include:

- One-button push auto recalibration (short cut button)
- Configure your individual hot keys according to your needs
- Ease of use interface making your user life much more convenient

Collaborative Solution DisplayNote NEC Edition (optional)

DisplayNote is a software and app solution which allows presenters to share any presentation to participants on their mobile, tablet or desktop device. Participants can capture content, make notes and the presenter can invite them to collaborate and share their screens with the rest of the group.
