SAMSUNG

Capture stunning pictures in bright daylight and super low light.

Our category-defining Dual Aperture lens adapts like the human eye. It's able to automatically switch between various lighting conditions with ease-making your photos look great whether it's bright or dark, day or night.

F1.5 aperture mode

If it's dark, the lens opens to F1.5 mode to pull in light for a bright and clear photo

F2.4 aperture mode

In the daylight, the lens shifts to F2.4 mode to help your picture come out sharp.

The camera that's brilliant in the dark.

The F1.5 aperture mode finds light even in the dark. So the low light camera delivers vibrant photos late into the night, meaning your camera no longer has a curfew.

Add music. Make GIFs. Get likes.

Super Slow-mo lets you see the things you could have missed in the blink of an eye. Set the video to music or turn it into a looping GIF, and share it with a tap. Then sit back and watch the reactions roll in.

The camera that turns you into an emoji, so you're not the "you" everyone else is.

Create an Augmented Reality version of yourself simply by taking a selfie. Then share your real-life feelings as emoji stickers and videos.

The camera that can instantly read what your eyes can't.

Get real-time translations when you need it. Live Translation lets you see the world in a new way.

The camera that recognises you instantly.

Intelligent Scan is a new technology that combines face recognition and iris scan to make unlocking simple even in low light.

Share your screen to your other Samsung screens, hassle-free.

Easily share photos and videos you've made by syncing your devices through your Samsung Account. So you can be at home even when you're someplace else.

The phone with an uninterrupted display.

See photos and videos as you want to see them, showcased on a beautiful edge-to-edge screen.

The phone that surrounds you in Dolby Atmos sound on stereo speakers tuned by AKG.

Hear the action with clarity thanks to the pure sound of the stereo speakers tuned by AKG. The addition of Dolby Atmos delivers rich and vibrant sound, giving you a theater-like audio experience.
