Secure Upgrade Plus

Secure Upgrade Plus offers an upgrade path from current Dell SonicWALL products, as well as a trade-in path from competitors' products. This offer recognizes the past investments that customers have made and helps them maintain optimal security by letting them easily and affordably replace their existing security appliances.

Customers who purchase the complete set of subscription services and support when upgrading a Dell SonicWALL product or trading-in a competitive product can save up to 50% on the total annual cost of that solution, compared to the cost of buying the hardware separately and renewing services each year.

Secure Upgrade Plus features firewall products, as well as other specified Dell SonicWALL product lines, including Secure Remote Access (SSL VPN) and Email Security (ES).

Customers who participate in Secure Upgrade Plus and upgrade or trade-in through the program to a Dell SonicWALL product also qualify to receive preferred customer loyalty bundle pricing on the purchase of additional products from Dell SonicWALL's other product lines.

See terms and conditions for qualified upgrade paths. For details on arranging upgrades to E-Class series products, contact your reseller or Dell SonicWALL representative.
