The PWA-VP100 vision presenter which is a software efficiently share mass information that includes video footage, image data, presentation slides, websites, and video conferences with people located across the world. The PWA-VP100 has various live source, PC files (such as videos, still images and PowerPoint slides), and websites can be assigned on screen. The Vision presenter can easily drag the different items of content to the main screen, and display them in full screen as desired. The Vision presenter can also switch content according to the end-users own agenda and vision. In this way, Vision Presenter not only makes presentations more efficient, attractive, and easier to comprehend, it also makes discussions more interactive and enhances communication.
