Unified Threat Management makes security simple
Sophos UTM gives you complete security from the network firewall to endpoint antivirus in a single modular appliance. It simplifies your IT security without the complexity of multiple-point solutions. The intuitive interface will help you quickly create policies to control security risks. And clear, detailed reports will give you the insight you need to improve your network performance and protection.

Consolidated network security platform-no compromise
Protect your network using multi-layered proven protection technologies including Advanced Threat Protection (ATP), IPS, VPN, email and web filtering combined with the industry's simplest admin interface. We've engineered our software and hardware to give you the throughput speeds you need. And, you can choose the level of protection you need with modular subscriptions as every feature is available on every appliance.

All the Next-Gen Firewall features you need
We'll give you complete control to block, allow, shape and prioritize applications. Our Deep Layer-7 inspection (Next-Generation Firewall) ensures true application identification and has regular automatic updates. And you'll get feedback on unclassified applications too.

Intuitive management and detailed reporting
You'll know what's happening with your users and you'll have complete control over all the features you need, with none of the complexity. Easily build policies while getting detailed real-time and historical data with our on-box reporting, helping you to fix problems fast. And our Free Sophos UTM Manager lets you centrally administer several appliances through a single login.

Connect remote offices with easy VPN and Wi-Fi
Sophos RED (Remote Ethernet Device) provides secure remote access to your off-site locations. It's the first security gateway that requires no technical skills at the remote site. Once installed, it forwards traffic to the UTM for complete security. Sophos UTM also works as a wireless controller; access points are automatically set up and receive complete UTM protection.

- Every feature available on every appliance
- Firewall, VPN, ATP, IPS, email, web filtering and app control
- Hardware, virtualized, software or cloud- based appliance
- Intuitive browser- based interface
- Built-in reporting on all models
- Two-factor authentication with one-time password (OTP) in many areas
- Integrated wireless controller

Main specifications:

License
  Software type: Renewal
  License term in years: 3 year(s)

Features

Language version: Multilingual
Compatibility: SG 135

Software
  Windows operating systems supported: Y
  Mac operating systems supported: Y
