XG Firewall offers industry leading protection to block the latest advanced threats like ransomware, bots, worms, hacks, breaches and APTs.

An industry first, XG Firewall integrates Deep Learning technology into our Sophos Sandstorm sandboxing. It's been developed by data scientists at SophosLabs and DARPA to deliver the industry's best detection rates without using signatures. It detects previously unseen malware lurking in suspicious payloads quickly and effectively. It's just one of the ways that XG Firewall stops unknown threats. Dead.

- Blocks unknown threats with a comprehensive suite of advanced protection including IPS, ATP, Sandboxing, Dual AV, Web and App Control, Anti-phishing, a full-featured Web Application Firewall and more
- Automatically responds to incidents by instantly identifying and isolating infected systems until they can be cleaned up
- Exposes hidden risks on your network including unknown apps, top risk users, advanced threats, suspicious payloads and much more
