Sophos Central

The unified console for managing your Sophos products.

Synchronized Security

Sophos Central allows you to manage our award-winning Synchronized Security platform. Advanced attacks are more coordinated than ever before. Now, your defenses are too. Our revolutionary Security Heartbeat ensures your endpoint protection and firewall are talking to each other. It's a simple yet effective idea that means you get better protection against advanced threats and spend less time responding to incidents. It's so simple, it makes you wonder why nobody did it before.

Find Threats Faster

Advanced threat indicators like suspicious network traffic are instantly shared between the Next-Gen Firewall and the Next-Gen Endpoint to detect and prevent attacks.

Simplify Investigation

Active identification of compromised systems shares computer names, users, and paths between your Endpoint and Firewall, so you can take action quickly.

Minimize Threat Impact

Compromised endpoints are automatically isolated by the firewall, while the endpoint terminates and removes malicious software. And, it saves IT time and money through automated incident response.

Not Just for Admins

Partner Dashboard

Sophos Central lets partners manage multiple customer installations from a single, intuitive interface. Respond to alerts, manage licenses, and track upcoming renewal dates.

Self-Service Portal

Users can log in to the self-service portal to customize their security status, recover their password, and get notifications.
