Get extreme protection without the bulk. The Tough Armor case for the iPhone 6 (4.7) is the new leader in protective cases providing better impact absorption than other boxy/bulky cases in the market. The Tough Armor is a dual layer case made of premium polycarbonate and anti-stretch TPU, not cheap plastic and expanding silicone. The new Air Cushion Technology corners reduce the thickness of the case while providing extreme protection for your iPhone 6. The 4-Point Rear Guard protects the polycarbonate backplate by lifting the backplate above the surface. The power and volume buttons are easier to press and more precise for a consistent experience. The port opening is made wide enough for third party chargers and the headphone jack opening is compatible with Beats by Dre headphones.

## Main specifications:

### Features

|                                    |                                    |
