Powerful protection for your mobile world and the Stuff in it

- Protects Android mobile devices, iPhone® and iPad®.
- Remotely pinpoints your missing device on a map.
- Lets you back up and restore your contacts.
- Protects Android devices from mobile threats.

Benefits

Protects multiple mobile devices with one easy-to-use Web-based service*

- Secures all of your mobile devices from one convenient website.
- Protects both Android smartphones and tablets.
- Lets you remotely locate and back up contacts from your iPhone® and iPad®.

Safeguards the personal Stuff stored on your mobile devices

- Backs up the contacts from your Android, iPhone®, or iPad® and easily restores them in case you accidentally delete them or get a new device.
- Lets you remotely lock lost or stolen smartphones and tablets through our secure website, so strangers can't use them or access your information.
- Lets you remotely erase the information on your device, if necessary, so your private information stays that way.
- Blocks fraudulent (phishing) websites designed to trick you into revealing personal information that can be used to steal your identity and money.
- Instantly locks your phone if the SIM card is removed, so it can't be used with another SIM card.

Helps you get back misplaced, lost, or stolen mobile devices

- Sets off a "scream" alarm if you misplace your phone or tablet so you can easily find it, even if the volume is set to silent or vibrate.
- Shows you the location of your missing device on a map to help you find it fast.
- Lets you display a customizable message to anyone who finds your missing device, so you can make arrangements to get it back.
- Takes a photo of anyone using your device, when in "lost mode". (Webcam-enabled devices only).

Stops mobile threats before they can infect your Android

- Protects against viruses, malware and other mobile threats.
- Gives you the power to eliminate mobile spam by blocking unwanted calls and texts.
- Automatically scans downloaded apps and app updates for threats and gets rid of them.
- Gives you the option of automatically scanning SD (Secure Digital) memory cards for threats when you plug them into your mobile device.

Features

- Web-based management - Lets you easily control the security for your devices in one convenient place on the Web.
- Scream alarm - Sets off a "scream" alarm, so you can quickly find your missing mobile device. Works with both Android and iOS smartphones and tablets.
- Remote locate - Pinpoints your lost or stolen phone or tablet on a map to help you find it fast. Now lets you locate your iPhone® and iPad®.
- Remote lock - Locks a lost or stolen phone or tablet to prevent strangers from using it and seeing anything that's

stored on it.

- Remote wipe - Lets you erase the information on your missing mobile device, including any data on phone memory cards. Works with both Android and iOS smartphones and tablets.
 - Sneak Peek - Remotely takes a photo to help identify who has your missing device. (Webcam-enabled devices only).
 - Call and text blocker - Lets you block calls and text messages from specific phone numbers or anonymous and unknown numbers. (Phone only).
 - Download threat protection - Checks your apps and app updates for threats and removes them without slowing down your device.
 - Contacts backup and restore - Saves contacts from your Android mobile device, iPhone® and iPad® so you can easily restore them if they are lost or deleted and share them across your devices.
 - Antiphishing web protection - Blocks fraudulent (phishing) websites to protect your sensitive personal information when you use mobile networks and Wi-Fi connections.
 - SD card scanning - Lets you automatically scan SD (Secure Digital) memory cards for threats when they're plugged into a device.
 - Lost Notice - Lets you send a customizable message to anyone who finds your missing device, so you can make arrangements to get it back.
 - SIM card lock - Instantly locks your phone if the SIM card is removed, so thieves can't use it with a different SIM card.
 - Norton Community Watch - Collects information volunteered by millions of Norton users to spot new threats faster, identify safe files, and provide stronger, more efficient protection.
