### Norton Security Standard

Our best protection for your Windows PC or Mac

Benefits for you:

- Provides real-time protection against existing and emerging viruses and malware.
- Delivers comprehensive protection you can't get from free antivirus software or your computer's operating system.
- Protects better and faster than the competition.1
- 100% guarantee: From the moment you subscribe, a Norton expert is available to help keep your device virus-free, or give you a refund.

We see more, analyze more and stop more online threats.

How long does it take for malware to infect your brand-new computer? If you use free or other inferior security software, maybe not long at all.

Cybercriminals are more sophisticated than ever before, and they use a diverse arsenal of tools to gain access to your information. Other security products just don't have the resources to keep up with new threats as they emerge.

But Norton products do. As the threats get worse, our products just keep getting better. Our teams of security experts are constantly analyzing new threats and devising new ways to protect your devices from them.
