The new in car tablet holder from Targus is designed to turn your tablet into a mobile entertainment system which will keep your back-seat passengers entertained on those long car journeys. The Targus in car tablet holder is designed to easily adjust and secure most tablets from 7"-10.1" to your car headrest, allowing you to mount your tablet at a comfortable viewing angle. The adjustable cradle utilises a state of the art BOA lacing system which locks into position to hold your tablet safe and secure. An adjustable strap fits onto nearly all types of car headrest. The low profile BOA control mechanism combined with the sleek mount design means that the tablet holder will fit neatly into a backseat pocket for a clutter-free car.
