Content Filtering Service

ZyXEL Content Filtering allows administrators to easily block certain types of web content without having to manually block each URL individually. This service is powered by BlueCoat which has an industry-leading URL filtering database with over 100M user requests per day for new ratings. The USG series can block up to 60 different categories (in advanced view) of web content allowing great flexibility in what kind of web content you wish to allow or block in your network. Filtering rules can be defined for all users, by group, or for individual users allowing maximum flexibility in enforcement.
