Simple, Secure Access Anywhere

- Easy-to-use configuration wizard and connection panel
- Supports Windows 7, Vista, Server 2008/2003, XP and 2000 operating systems
- Supports all connection types: dial-up, Ethernet, Wi-Fi and 3G, etc.
- Compatible with ZyWALL and other IPSec VPN gateways
- VPN configuration can be stored in a file for easy management

User-friendly interface

The ZyWALL IPSec VPN Client is designed for mobile users to establish a secure connection to corporate networks over the Internet. With a 3-step configuration wizard, ZyWALL IPSec VPN Client helps users to create VPN connections quicker than ever. The user-friendly interface makes it easy to install, configure and use. With ZyWALL IPSec VPN Client, setting up a VPN connection is no longer a daunting task.

High compatibility

ZyWALL VPN Client runs on Windows 7, Vista, Server 2008/2003, XP and 2000 operating systems; the strong encryption options and various authentication methods give ZyWALL IPSec VPN Client the best compatibility with ZyWALL and other IPSec VPN gateways. The ZyWALL IPSec VPN Client supports all connection types like dial-up, Ethernet, Wi-Fi and 3G, etc., and it's very easy for mobile users to initiate connections from all kinds of environments

Easy deployment and management

Since configuration and parameters can be stored as a unique duplicable file, deploying ZyWALL IPSec VPN Clients is as easy as copying the file. Moreover, VPN configurations and security elements (certificates and pre-shared key, etc.) can be saved on a USB disk in order to remove authentication information from the computer. It's very easy for administrators to control and manage the deployment and security options.

High scale flexibility

For both small businesses concerning network security and large corporations equipping their remote workforce, ZyWALL IPSec VPN client represents an efficient and affordable solution for projects of all scales.
